# **PRECAUTIONS**

Make sure that you plug your scale into the proper power outlet. Plug into a power outlet 30 minutes before operations.

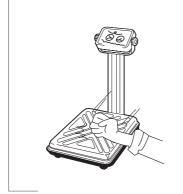

Place the scale on a flat and stable surface.

Do not put the scale on a sudden temperature changes.

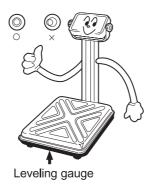

Do not put the scale on a sudden impact to the platter.

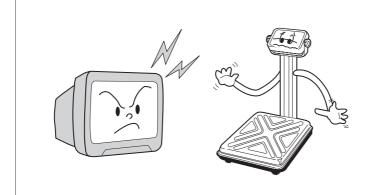

This scale must be installed in a dry and liquid free environment.

If the scale is not properly level, please adjust the 4 legs at the bottom of the scale (turn legs clockwise or counterclockwise) so as to center the bubble of the leveling gauge inside the indicated circle (See Fig.)

Keep away from the place which occurs the strong EMI noises.

# **PREFACE**

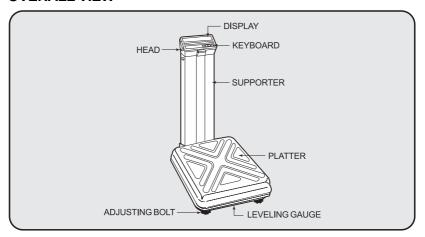

Thank you for purchasing our CAS DB-1/1H series scale.

These series have been designed with CAS reliability, under rigid quality control and with outstanding performance. Your specialty departments can enjoy these high quality reliable CAS products.

We believe that your needs will be satisfied and you will have reliability. This manual will help you with proper operation and are of the DB-1/1H series. Please keep this handy for future reference.

## NAMES AND FUNCTIONS

### **OVERALL VIEW**

### **DISPLAY**

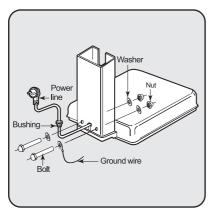

### **KEYBOARD**

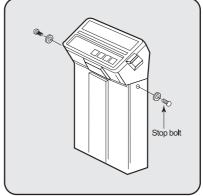

fig. 4

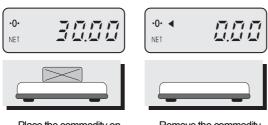

# **OPERATIONS**

## 1. General Weighing

- When you turn on the power switch, the scale will count "00000" to "99999".

  Then the scale will read "0.00" in the weight display. This is called the ZERO state.

  If the scale is not ZERO state though there is nothing on the platter, press the •0• key.
- The display indicates if the scale is at zero or if there is a tare entered into the scale by way of a •O and NET lamps.

Place the commodity on the platter.

Remove the commodity from the platter.

# 2. Tare Weighing

- Tare is the weight of container being used for a commodity.
- The ► key subtracts the weight of the container.

Place the container on the platter.

Press the ►T key.

Place the commodity in the container.

Remove the commodity from the platter.

Remove the container from the platter, then you will see tare weight with "-".

Press " ►T " key.

# 3. Hold Function (Hold version)

- Key hold
- 1) Place an item on the platter and then press the HOLD key.

"HOLD" is shown on the display.

Average weight is shown on the display.

- After average weight display 3 time, HOLD function will be release automatically.
- Auto Hold function

Use "TARE" key to select

① After weighing item remove all of the container from the platter. press Hold key.

**-**0⁴

one of Auto Hold function.

Press "Hold" key to save and exit to normal mode.

Place an item on the platter. Then weight display will show "Hold". The "Hold" blinks for two times, and then the average weight blinks continuously.

After remove the item of the platter, place another item on the platter. Then display will show average weight again. If you don't want use auto-hold function, remove the item and press hold key. Display shows AH\_on. Press tare key. It will be changed AH\_off. Then press Hold key. Auto-hold function will not operate.

NET

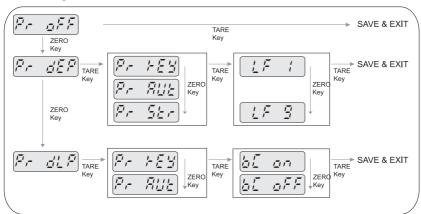

# 4. How to Print (print version)

While pressing the PRINT key, press the POWER key. The display shows "U SEt".

Press the TARE key, the display shows "Pr off".

(If the setting value already exist in the scale, then it would display as the setting.)

You can change the setting by pressing the ZERO key . Press TARE key to save and move next function setting.
