

Load cell PR 6212, converter Connexx® for maximum corrosion resistance

ⓘ Load cell PR 6212 benefits

- Maximum corrosion resistance
- High-temperature version available for up to 180 °C
- Easy and failure-free installation using the mounting kit PR 6012

ⓘ Mounting kit PR 6012 benefits

- Integrated jack-up and dummy function
- Low installation height

The load cell PR 6212 is a state-of-the-art product. This corrosion-resistant load cell has a compact design and also features high heat resistance. Its long product lifetime minimises downtime and ensures safer and more reliable processes in the chemical and steel industry.

Corrosion resistance and precision for demanding applications

- ⓘ Stainless steel 1.4418, unique in weighing technology, ensures **maximum corrosion resistance**. The PR 6212 is **also available with protective coating** for use in extremely aggressive environments.
- ⓘ The perfectly coordinated combination of the load cell PR 6212 and mounting kit PR 6012 meets all precision and handling requirements. The **inverted installation** provides additional corrosion protection for the load cell and **is simple and failure-free**.
- ⓘ The compact design **ensures a low system height** and allows for easy retrofitting of weighing technology.

Less corrosion, more cost-efficiency

The combination of the load cell PR 6212 and mounting kit PR 6012 makes quick and easy installation possible and facilitates consistently reliable and precise measurement results in the chemical and steel industry.

Scan the QR code and watch our video showing the load cell PR 6212 in endurance test.

Laser labelling for long-lasting product identification

Compatible with PR 6211 and PR 6011

Optional: high-temperature version for up to 180 °C

Highest corrosion resistance stainless steel 1.4418 – unique in weighing technology

Additional corrosion protection thanks to smooth finish and lack of horizontal surfaces

Compact design for easy installation

Optional: protective coating for extremely aggressive environments

Combined for reliable installation: PR 6212 and PR 6012 as a complete solution

The load cell PR 6212 is not only fully compatible with all mounting kits from the PR 6012 range but also with the previous PR 6011 range. The innovative complete solution ensures failure-free and efficient installation. Thanks to the integrated jack-up function there is no need for external lifting devices and even a load cell dummy is no longer required.

Large mounting holes for flexible installation

Optional: reinforced lift-off protection for lift-off forces up to 45 kN

Inverted installation of the load cell provides additional corrosion protection

Integrated lift-off protection with extended horizontal tolerances absorbs temperature fluctuations

Integrated constrainer to protect against horizontal forces

Integrated jack-up and dummy function for easy installation of the load cell

Load cell technical specifications

Optionally available with protective coating for especially aggressive environments and as a high-temperature version

PR 6212 technical data

Converter Connexx®

Fitted with the converter Connexx®, the load cell PR 6212 offers a whole host of possibilities:

- The digital version guarantees fast signalling times for reliable dosing processes.
- Thanks to the use of field bus communication, the cable junction box is no longer needed.
- The standard interface CANopen ensures straightforward installation and calibration.
- CANopen allows for extra-long communication paths of up to 200 m.
- Weight values can also be generated individually – per load cell – meaning that defective load cells can be identified more easily.

Mounting kit PR 6012/X1 dimensional drawings

The mounting kit PR 6012/X1 was developed for use in the toughest conditions. The inverted installation of the load cell combined with the special high-quality material of the mounting kit make a complete solution capable of withstanding chemically aggressive, corrosive environments. The measurement results are also not affected by temperature fluctuations thanks to large lateral tolerances and the integrated horizontal constrainer. What's more, the mounting kit was designed to be especially easy and reliable to install.

Mounting kit PR 6012/X2 dimensional drawings

In addition to the features of the PR 6012/X1 the mounting kit PR 6012/X2 range also has extensive additional functions that make installation and operation of the weighing technology easier. The integrated jack-up function eliminates the need for external lifting devices, while the integrated dummy function makes easy installation possible – without damaging the sensitive load cell. Lift-off protection up to 45 kN effectively prevents the vessel from tipping.
