XQ-501 Dot-matrix Printer

The XQ-501 printer, which has compact appearance and concise operation interface, is specially designed for balances. It can meets basic data printing needs.

■ Specifications

※ Printing Method: 8 pins shuttle impact dot matrix.

※ Character size：1.7mm（W）x 2.6mm（H）

※ Housing: 14.6(W)×86.6(H)×188.2(L)

※ Paper: 44（W）x50（Dia.）mm，normal paper

※ Port: RS232

■ Features

◆ High-speed impact dot matrix printing, which is suitable for long-term storage.

◆ Communication parameters Auto-set: can automatically detect communication parameters, such as baud rate, data bits, stop bits, etc, to solve communication problem, can automatically identify and set the communication parameters.

◆ Supply a RS232 interface and a USB port. The USB port connects with computer can updates firmware and sets parameters.

◆ Compatible with Windows virtual keyboard function.

◆ 9-25V wide range input, polarity protection, over current protection.

◆ High reliability/durability design.

Automatic Internal CAL
